

# CASE STUDY: BUILDING CLEAR OUT FOR GLOBAL TELECOMMUNICATIONS COMPANY

## Client Need

Due to a lease term expiration, the client needed to empty two 60,000 sq. ft. buildings and one 20,000 sq. ft. building of all furniture, fixtures and equipment (FF&E) assets. In addition, all FF&E assets must be carefully prepared and stored for redeployment to other locations in the United States and Canada.

## How We Helped

As the local service provider for this organization, Daryl Flood Relocation & Logistics' Commercial Moving division was tasked to work directly with the FF&E Program Manager to accomplish this building clear out within the six-week deadline. Daryl Flood crews worked diligently to empty 140,000 sq. ft. of FF&E assets, package them for shipment and store them in our secure warehouse. Each asset was labeled and inventoried to ensure seamless redeployment.

## Key Services

- Office Moving Services
- Project Management Services
- Secure Warehouse Storage
- FF&E De-Installation Services

## What Our Customer Said

"My account managers were engaged, responsive, and asked great questions participating in project meetings early on to ensure that full scope of work was accounted for, and that pricing was accurate. They were so easy to work with as we implemented the distribution strategy, which included a rigorous furniture swap out schedule at our corporate headquarters. When you engage with a company like Daryl Flood, who has partners across the U.S., you are paying for the assurance that someone is going to truly digest the information and take ownership of the entire process from de-installation and storage, to transfer and re-installation. I can rely on them to be responsive, provide updates quickly, and flex to the constant changes. They have been instrumental to our success, and I would absolutely recommend them."

## Goal

To clear out three campus buildings of FF&E assets within a six-week deadline, ensuring all assets are carefully protected and stored until redeployment.
